

Medical Electronics Faculty Completes FDP on Generative AI in Healthcare

Mrs. V. Kavitha, Faculty member of the Medical Electronics Department, has successfully completed a six-day Faculty Development Programme on “Generative AI in Healthcare: Transforming Diagnostics and Therapeutics”, conducted by the Department of Biomedical Engineering, Sri Shakthi Institute of Engineering and Technology, Coimbatore, in association with BMESI.

Faculty Attend AI Refresher Course

On the tenth day of the refresher course on “AI for Modern Engineering” held at Coimbatore Institute of Technology (CIT), Coimbatore, faculty members G. Ashish, Assistant Professor, IT, and N. Sathyaraj, Assistant Professor, Robotics and Automation, participated in the programme. The course continues to focus on enhancing faculty expertise in artificial intelligence applications relevant to modern engineering practices.

**STUDENTS CORNER****On This Day**

December 18 is a significant day in the history of electronics and communication. Here are some notable events:

- 1958: The United States launched the world's first communications satellite aboard an Atlas rocket, marking a major milestone in satellite communication.
- 1947: John Bardeen and Walter Houser Brattain invented the first working transistor at Bell Telephone Laboratories, revolutionizing electronics.
- 1971: Intel released the Intel 4004, the first commercially available microprocessor, which integrated all components of a computer's central processing unit (CPU) onto a single chip.
